Mitigation Plan Concept
Timpanogos Special Service District

1. Removal of invasive species and replacement with native vegetation.
2. Regrading of site to create a diversity of habitat, eg, stream channels, meadows, emergent and open water wetlands, ponds.
3. Develop habitat for sensitive species (least chub, northern leopard frog, Colombia spotted frog).
4. Acquire and preserve 107 acres of undeveloped shoreline land.
5. Dedicate a Permanent Water Supply to Sustain Shoreline Wetlands and Utah Lake.
6. Restore the Natural Hydrology and Habitat of Over 150 acres of Wetlands.
7. Restore the Delta of a Historic Drainage.
8. Protect and Restore almost 1.5 miles of Utah Lake Shoreline.
9. Construct over 4.5 miles of new Paved, Boardwalk and Soft Trails.
10. New Elevated Viewing Tower(s) and education center.
